Frontend Developer & UX/UI Design

Recent Computer Science graduate with a passion for crafting intuitive, user-centered designs. Experienced in leading and collaborating on projects to create innovative, visually appealing, and highly functional digital products. Proficient in user research, wireframing, prototyping, and frontend development, with a strong foundation in a variety of programming languages and tools.

EDUCATION

Bachelor of Science, Computer Science

University of California, Santa Cruz | June 2024 | Cumulative GPA: 3.6

- Relevant Coursework: User Experience for Interactive Media, Data Structures and Algorithms (C/C++), Applied Discrete Mathematics, Computer Systems and Assembly Language, Linear Algebra

Google UX Design Certificate, Remote | Sept 2024 - Oct 2024

- Completed coursework focused on UX design principles, prototyping, wireframing, and user research methodologies.

SKILLS

User Experience (UX)

Design User Interface (UI)

Design Frontend Development

Prototyping & Wireframing (Figma)

Web Application Development

Game Development

Collaboration & Teamwork

Problem Solving & Debugging

Technical Skills

Programming Languages: C++, C#, C, JavaScript, TypeScript, HTML, CSS, Python

Tools/Frameworks: Figma, React.js, Github, VS Code, Rider

Game Engines: Unity, Unreal Engine 5

PROFESSIONAL EXPERIENCE & PROJECTS

Frontend Development & UX/UI Design

Lead Designer, Habit Tracking Mobile Application Prototype, University Project

Spring, 2024

- Conceptualized and designed a mobile app aimed at improving work-life balance for students, focusing on productivity and stress management through scheduled mindfulness activities.
- Led the design of high-fidelity prototypes using Figma, improving design efficiency by 40% with intuitive features such as task management, timers, and detailed event views.
- Conducted user research and usability testing, enhancing usability by 30% through iterative feedback, ensuring a polished final product.

Frontend Developer, Cognoso Web Application, Personal Project

Winter, 2024

- Developed frontend components with TypeScript and React.js for interactive digital flashcards from PDF documents, while working with a team to deliver the study tool on time and exceed quality standards.
- Designed key UI elements, including navigation menus, flashcard layouts, and interactive buttons, improving user satisfaction by 25% through a clean and user-friendly interface.
- Conducted user research and usability testing, refining the design and increasing overall usability by 20% based on feedback.

Game Development

Game Software Developer Internship (UI Design), Glade Tool Inc, San Francisco, CA

May 2024 - August 2024

- Developed a UI inventory system in Unreal Engine 5, allowing players to collect and store items, with a blurred background and organized square slots when the UI pops up for visual appeal.
- Collaborated with a team to prototype and implement new game features, maintaining clear communication and thorough documentation throughout the project lifecycle.

Co-Developer & Designer, Dark Throne, University Project, UCSC

Spring, 2024

- Designed and implemented AI-driven features, including an enemy-player tracking system for a 2D indie game.
- Enhancing gameplay dynamics and player adaptability by 30% and gameplay difficulty by 25%.
- Additionally, oversaw product design, quality assurance, and project management, ensuring development milestones were met on time and gameplay was refined based on user feedback, improving overall user satisfaction by 15%.
- Successfully shipped the game on Steam for PC platforms.
